SUMMARY

Software Technology student (4th semester) focused on backend development with strong experience in C# and software design. Earned grade 12 in Advanced Project-Oriented Programming and built a Splitwise-inspired .NET 8 REST API using Clean Architecture, PostgreSQL (Docker), and EF Core.

Currently seeking a backend-oriented student role to contribute to production-level systems and grow within modern software engineering.

SKILLS

C#, .NET 8, ASP.NET Core, REST APIs, Entity Framework Core, PostgreSQL, SQL, Clean Architecture, Object-Oriented Programming, Backend Development, Docker, Git, Unit Testing, Software Design Principles, Agile Development, VS Code

PROJECTS

Roommate Expense Splitter API

2025

Personal Backend Project

.NET 8 / PostgreSQL

- Developed a Splitwise-inspired REST API for managing shared expenses, balances, and settlements between roommates.
- Built using ASP.NET Core and C#, focusing on clean backend design and scalable architecture.
- Implemented Clean Architecture principles with clear separation between domain, application, and infrastructure layers.
- Used PostgreSQL running in Docker and Entity Framework Core for persistence and database management.
- Designed domain logic to ensure accurate financial calculations and reliable expense tracking.

EDUCATION

Bachelor of Engineering (B.Eng.) in Software Technology

2024 – Present

University College (Diplomingeniør)

Relevant Coursework: Advanced Object-Oriented Programming (C#), Data Management, Industriell Cyber-Physical Systems, Component-Based systems, Fundamentals of Software Engineering
